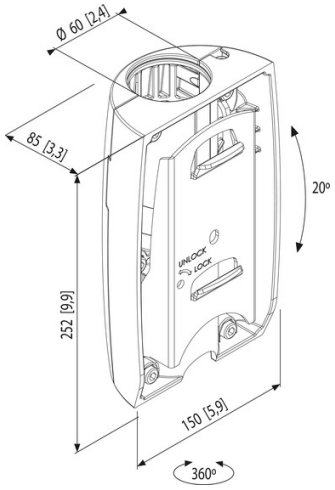
Guarantee	5 years



PFA 9001 Turn and tilt unit

The PFA 9001 turn-tilt unit is part of a modular system which enables you to create your own ceiling or floor mounting solution for flat displays up to 60 kg. The Autolock® locking system locks the interface onto the mount and prevents the display from falling of the turn-tilt unit when accidently lifted. The optional lock PFA 9008 blocks the locking system, hence preventing theft. The tilt indicator makes it easy to set up multiple displays at the same angle, for example at airport counters or vidi-walls (max. 20° tilt). For ceiling mounting just add the needed ceiling plate, extension tube and universal flat display interface (FAU 3150/3125). In case of floor mounting add floor stand PFA 9011 and the needed universal flat display interface (FAU 3150/3125).
